DETAILED ACTION

This application contains claims directed to more than one species of the generic invention. *completely Androgen* These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(A₁) a gestagen component (claim 4); (A₂) an antigestagen component (claim 5);
~~(A₃) an antiestrogen component (claim 6); (A₄) a GnRH-analog component (claim 7);~~
(A₅) a testosterone-5 α -reductase-inhibitor component (claim 9); (A₆) an α -andreno-
receptor-blocker component (claim 10) or (A₇) a phosphodiesterase-inhibitor component
(claim 11).

Applicant is required, in reply to this action, to elect a single species from A₁-A₇ to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each species has a unique mode of action, different from the others.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1617

A telephone call was made to Mr. Anthony J. Zelano on Wednesday April 11, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen Nguyen whose telephone number is (703) 605-1198. The examiner can normally be reached on M-F (9:00-4:30).
